SUBJECT 5: PEDAGOGY (20%)

Teaching Methods · Child Development · Assessment

5.1 Bloom's Taxonomy (Revised)

● Bloom's Taxonomy (1956, revised by Anderson & Krathwohl 2001) classifies cognitive skills into 6 levels:

Level 1 — Remember: Recall facts: define, list, name, memorize.

Level 2 — Understand: Explain ideas: describe, summarize, classify, paraphrase.

Level 3 — Apply: Use knowledge in new situations: solve, use, demonstrate.

Level 4 — Analyze: Break down information: compare, differentiate, examine.

Level 5 — Evaluate: Make judgments: assess, critique, justify, argue.

Level 6 — Create: Produce new work: design, construct, compose, plan.

● **HOTS** (Higher Order Thinking Skills) = Analyze, Evaluate, Create | **LOTS** = Remember, Understand, Apply

5.2 Child Development Theories

Jean Piaget (Cognitive Development):

● • Sensorimotor (0-2 yrs): object permanence develops.

● • Preoperational (2-7 yrs): symbolic thinking, egocentric, no conservation.

● • Concrete Operational (7-11 yrs): logical thinking about concrete objects, conservation achieved.

● • Formal Operational (12+ yrs): abstract reasoning, hypothetical thinking.

Lev Vygotsky (Sociocultural Theory):

● • Zone of Proximal Development (ZPD): gap between what a learner can do alone vs. with guidance.

● • Scaffolding: temporary support provided by teacher/peer to help learner cross ZPD.

● • Learning is social — language and interaction drive cognitive development.

Erikson (Psychosocial Development): 8 stages — most tested: Trust vs Mistrust (infancy), Industry vs Inferiority (school age 6-12).

Kohlberg (Moral Development): 3 levels: Pre-conventional, Conventional, Post-conventional.

Pavlov: Classical conditioning: stimulus-response learning. | **Skinner:** Operant conditioning: reinforcement/punishment.

5.3 Teaching Methodologies

Lecture Method: Teacher-centered; efficient for large groups; passive learners.

Inquiry-Based Learning: Students ask questions and investigate; promotes critical thinking; Constructivist.

Cooperative Learning: Students work in small groups; develops social skills (Jigsaw, Think-Pair-Share, STAD).

Problem-Based Learning (PBL): Real-world problems as starting point; learner-centered; develops analytical skills.

Project-Based Learning: Extended inquiry resulting in a product/presentation; authentic assessment.

Demonstration Method: Teacher shows; students observe then practice; best for procedural skills.

Discussion Method: Two-way communication; develops higher-order thinking and communication skills.

Discovery Learning (Bruner): Learners construct knowledge through exploration and discovery.

5.4 Types of Assessment

Formative Assessment: Ongoing assessment DURING learning (quizzes, exit tickets, observation). Improves learning.

Summative Assessment: Assessment AT THE END of instruction (final exam, term paper). Measures achievement.

Diagnostic Assessment: Before instruction — identifies prior knowledge and gaps (pre-test).

Norm-Referenced: Compares student to peers (e.g., national tests, IQ tests).

Criterion-Referenced: Compares student against a fixed standard (e.g., driving test, passing mark of 50%).

Authentic Assessment: Real-world tasks: portfolios, presentations, projects.

Portfolio Assessment: Collection of student work over time showing growth and reflection.

5.5 Classroom Management & Key Concepts

Motivation theories: Maslow's Hierarchy (Physiological→Safety→Love→Esteem→Self-Actualization) | Intrinsic vs Extrinsic motivation

Individual differences: Students differ in learning styles, pace, background, ability. Differentiated instruction addresses this.

Inclusive education: Teaching ALL students in the same environment regardless of ability or disability.

IEP: Individualized Education Program — customized plan for students with special needs.

Multiple Intelligences (Gardner): Linguistic, Logical-Mathematical, Spatial, Musical, Bodily-Kinesthetic, Interpersonal, Intrapersonal, Naturalist.

Transfer of learning: Positive transfer: prior learning helps new learning. Negative: prior learning interferes.

Curriculum types: Formal (written/official), Informal (hidden curriculum), Non-formal (outside school).

- **Classroom rules:** Establish early, involve students, be consistent, use positive reinforcement.
